

GABE FINCH

JS/RUBY/PYTHON DEVELOPER

gabefinch@gmail.com

(541) 513-5643

Portland, Oregon

Summary

Howdy. I am a junior developer based in Portland, Oregon. Are you building an awe-inspiring web app? Maybe I could help. I want to be a part of a team of hard-working talented developers who are excited about their projects, who value mentorship, who push their limits, who refactor, who write test-coverage, and who value agile. I want to **grow** a lot as a developer over the next few years, and I am looking for an employer that can provide me with opportunities to do that. I've been coding since middle school, I bring maturity, leadership, and a plenitude of experience in multiple languages, frameworks, and libraries. If you are seeking someone to bring the **awesome-sauce**, we need to talk.

Skills

Creativity

Experience building dozens of apps, from vision stage to full realization.

Teamwork

History of being on winning teams. People-skills, non-diva, no-drama.

Leadership

Proven ability leading small teams to produce work above their individual abilities.

Technical

Ruby on Rails	AngularJS	Mocha/Chai	Ruby	Haml
Rspec	Ember.js	Sass	Bootstrap	HTML/CSS
Javascript	jQuery	Foundation	iPython	Python
Data Analysis	TDD	PostgreSQL	Sinatra	AJAX
Graphing	Bash	Algorithm Design	Middleman	Data Structures
Agile	REGEX	ActiveRecord	Git/Github	Code Art

Experiences

EyeCue Lab - <http://www.eyecuelab.com/>

Intern

2015 -

2015

Full stack development of an inventory tracking app for a local soup kitchen. Utilized Rails-API, Active Model Serializer, and AngularJS. Completing this project gave me a deeper understanding of tree data structures, JSON serialization, Angular best practices, cacheing, and handling promises in JS.

Epicodus - <https://www.epicodus.com/employers.html>

Student

2015 -

2015

At Epicodus I learned web development from the ground up full-time over 5 months. Curriculum emphasized BDD, Agile, Sinatra, Rails, jQuery, Angular, Ember, SQL, ActiveRecord, RESTful APIs, pair programming, and personal growth.

Projects

[Answer Me - http://vast-shore-5799.herokuapp.com/](http://vast-shore-5799.herokuapp.com/)

A question and answer board with user authorization, full CRUD, and partial AJAX. Written in Ruby on Rails with some jQuery and Bootstrap.

[Deep Thoughts - http://vast-atoll-2332.herokuapp.com/](http://vast-atoll-2332.herokuapp.com/)

Blogging platform in Rails with Devise user auth, comments etc. Some AJAX features using jQuery. Styled with Bootstrap. All content by Jack Handey.

[FlashCards - http://alexkaufman06.github.io/tech-vocab/index.html](http://alexkaufman06.github.io/tech-vocab/index.html)

A flash card Angular single page app with smart sorting algorithm built by a small team of Epicodus students in AngularJS over three days. Styling utilizes Bootstrap.

[Chess - https://github.com/rallyb13/chess_game](https://github.com/rallyb13/chess_game)

Sinatra web app chess game built with Active Record/Postgresql backend over three days with a small group.

[Lonely-Mail - http://gabefinch.github.io/lonely-mail/](http://gabefinch.github.io/lonely-mail/)

Faux email interface built with Ember and Bootstrap. Styled with Bootstrap.

[Humble Pie Pizza Co. Website - http://gabefinch.github.io/humble-pie-pizza/](http://gabefinch.github.io/humble-pie-pizza/)

A simple single-page app allowing users to put together their pizza order before calling it in to the vendor. Utilizes Javascript/jQuery. Completed in 8 hours.

[Littr - http://gabefinch.github.io/litr-kitty-twittrclone/](http://gabefinch.github.io/litr-kitty-twittrclone/)

A Twitter clone built in EmberJS over 8 hours. Cat-themed purely for reasons of amusement.
